This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

**Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

**About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

# 20th ANNOUNCEMENT

OF

# LECTURES

AT THE

# New York Ophthalmic School and Hospital.

**SESSION OF 1871–'2.**

The Trustees of this institution take pleasure in announcing that the course of instruction will commence on Wednesday evening, November 1st, 1871. The lectures will be given on Wednesday and Saturday evenings, through the Winter. They will be finely illustrated, and free to physicians and students of medicine.

## COURSE OF INSTRUCTION.

T. F. ALLEN, M. D.,

*Ophthalmoscopy and Diseases of the Optic Nerve, Retina, and Choroid.*

C. A. BACON, M. D.,

*Anatomy and Physiology of the Eye, and Anomalies of Refraction and Accommodation.*

J. Mc. E. WETMORE, M. D.,

*Diseases of the Cornea, Iris, and Lens.*

HENRY. C. HOUGHTON, M. D.,

*Diseases of the Ear, with Methods of Examination and Treatment.*

At the close of the session those who shall pass a satisfactory examination before the Board of Surgeons, will, on payment of ten dollars, receive from the Trustees, the Diploma of the Hospital.

**CLINICS DAILY AT 2 P. M.**

*Note.*—The lectures of Dr. LIEBOLD will be given in the course of instruction at the Homœopathic Medical College.

# ANNOUNCEMENT.

The Board of Trustees of the New York Homœopathic Medical College take pleasure in announcing to the Profession, the completion of arrangements, whereby one of the most elegant and commodious edifices in the City of New York (combining the New York Ophthalmic Hospital and the College) will be ready for the reception of students by the beginning of the coming session. The building—a cut of which can be seen on the cover of this announcement—is five stories high; of a highly ornamental style of architecture; has a front of fifty feet on Third Avenue, and a depth of one hundred feet upon Twenty-third Street, and will cost, when completed, $140,000. The appointments will be complete in every respect. The Lecture-rooms have been so arranged with reference to sound and light, that every student can, with facility, hear the Lecturer distinctly, and witness any demonstrations or experiments which may be performed. In addition to the usual Faculty-rooms, Museum, and Dissecting-rooms, the Surgical-wards are placed adjacent to the Amphitheatre, in order that patients operated upon before the class, can be moved immediately to their beds in the Hospital to receive the proper attention and after-treatment, thus giving the student opportunity to witness the *medical* management of surgical diseases, by far the more important consideration to those professing Homœopathy.

Digitized by Google

## The College Dispensary,

which receives appropriations from the city and State, is in full and successful operation, affording the Professor of Clinical Medicine an abundance of material for his lectures; and members of the class are allowed to assist in the Dispensary service.

## The New York Ophthalmic Hospital,

showing perhaps, a greater success than any similar institution in the country—the daily clinics averaging from seventy-five to one hundred patients—and which will contain about sixty beds for the accommodation of those under treatment—being under the same roof with the College—will offer superior advantages to the students. During the past session, members of the graduating class, under the direction and supervision of the Surgeons of the Hospital, were allowed to perform operations on the eye, and one of the most successful of these—for strabismus—was made by a member of the graduating class.

## The Aural Department

is also rapidly gaining favor, and all the newer methods and apparatus for examination and treatment of this rather neglected branch of Surgery will be explained to the student.

In addition to this,

## The Regular Course of Lectures on Ophthalmic and Aural Surgery,

as mentioned elsewhere in this announcement, will be given by the Surgeons of this charity to the classes of the College, *without extra charge.*

Digitized by Google

## Clinical Instruction.

Fully aware of the importance of Clinical instruction, the effort will be made to hold one or more clinics every day in the week: two in Surgery, three in Medicine, one in Obstetrics and Diseases of Children.

Besides the usual facilities of the Dissecting-room, and practical demonstrations in Anatomy—both regional and surgical—there will be lectures delivered upon the duties of assistants, and upon bandaging, and other points in Minor Surgery.

## Museum.

A very large addition has been made to the Museum from many and varied sources, and the Microscopic Department now has in its armamentarium a fine collection of preparations and objectives. The student will receive lessons in the use of this now indispensable instrument from the Professor of Histology, who is thoroughly experienced in this branch of science.

For information on any subject connected with the business affairs of the College, address the Registrar,

J. W. DOWLING, M. D.,

58 West 25th Street.

# EXTRA ANNOUNCEMENT.

As an extraordinary inducement to students to attend the GRADED COURSE, in accordance with the suggestion of the American Institute of Homœopathy, the Faculty have adopted the following curriculum of study, which is earnestly recommended to students, but is not considered obligatory upon them

FIRST YEAR—Anatomy, Physiology, Institutes, Histology, Chemistry, and Dissections. Fee, $60.

SECOND YEAR—Review the studies of the First Year, and attend the Lectures on Surgery, Practice of Medicine, Obstetrics, and Materia Medica. Fee, $100.

[At the close of this year the Student may be examined in the studies of the First Year, and if proficient will receive a Certificate of Graduation in those studies.]

THIRD YEAR—Review Studies of the Second Year, and, in addition, receive instructions in History of Medicine, Clinics, Medical Jurisprudence, Psycological Diseases, Ophthamology, and Aural Surgery. No Lecture Fee.

# REGULATIONS OF THE COLLEGE.

The regular Course of Lectures will commence on the second Tuesday of October, and end on the last day of February.

Candidates for graduation must, in accordance with the law of the State of New York, be twenty-one years of age, and of good moral standing; must have studied medicine three years with a qualified physician, and attended two full courses of lectures, the last of them at this College.

The tickets must be taken by the second Monday of November, to constitute a full course.

Students who have attended two full courses in this College, or one in this and one in some other medical college, will be required to matriculate only.

Each candidate for graduation must, on or before the first of February, deliver to the Dean of the Faculty a thesis composed by himself, and in his own handwriting, on some medical subject; and it shall be referred to the Faculty for examination.

The fee for graduation must be paid at the time of presenting the thesis; and in case of the student's rejection, this fee shall be returned to him.

Notice that his examination has proved satisfactory, shall be given by the Dean to each successful candidate, who shall record his name and address upon the list of graduates, with the title ot his thesis.

Digitized by Google

In unsatisfactory cases the candidate may have a second examination before the whole Faculty, with their consent.

The names of the successful candidates shall be reported by the Dean to the Board of Trustees, in order that, if approved by them they may order the conferring of the degree of Doctor of Medicine.

No candidate may be absent from Commencement without permission of the Faculty.
